MODULE 3.3, HANDOUT #1: Types of wildlife use, products, services and benefits

Wildlife use / utilisation	Consumptive use	Trophy hunting	Wildlife products include:	Tangible benefits include:JobsIncome (N\$)		
		Sport/premier hunting	Meat (also for cultural			
		Harvesting/culling (large numbers)	events) • Hides and skins	Social support – e.g., for elderly, orphans, youth,		
		Shoot and sell (smaller numbers)	Potentially for biltong and smoked meats Company Company	funerals • Meat		
		Own-use	 Horns, warthog tusks (for craft/curio sector) 	• Infrastructure		
		Live capture and sell	Traditional muti/medicine	Intangible benefits include:		
	Non- consumptive use	Tourism	Tourism services include:	 Capacity and skills (individual) Increased livelihood security Institutional strengthening Entrepreneurial opportunities 		
			Accommodation			
			Food and beverages			
			Transport A chivitian in all valing a quiding			
			 Activities, including guiding and specialist activities 	 Cultural assets/values 		
			 Information and interpretation 	Knowledge		
			Crafts and curios	 Sustainable NR production systems 		
		Environmental education		Recognition		
		Research	Ecosystem services			
		,		Biodiversity values		

MODULE 3.3, HANDOUT #2: Game value prices for different types of wildlife utilisation

Note: Conservancies are the producer. However, these prices come from the whole wildlife sector – of which communal conservancies currently make up a small percentage.

	Prices (N\$)										
Species	Trophy hunting	Premium hunting	Live sale		Meat prices / kg	Smoked meat	Biltong	Hides			
	to producer	to producer	At auction	To producer	to producer	to producer	to producer	to producer			
Blue wildebeest											
Red hartebeest											
Tsessebe											
Common duiker											
Springbok											
Klipspringer											
Damara dik-dik											
Oribi											
Steenbok											
Common impala											
Black-faced impala											
Roan											
Gemsbok											
Sable											
Buffalo											
Kudu											
Sitatunga											
Bushbuck											
Eland											
Reedbuck											
Waterbuck											
Red lechwe											
Puku											
Giraffe											
Hippopotamus											
Warthog											
Bushpig											
Burchell's zebra											
Hartmann's mountain zebra											
Black rhinoceros											
White rhinoceros											
African elephant											
Spotted hyaena											
Cheetah											
Leopard											
Lion											

MODULE 3.3, HANDOUT #3: Self-assessment evaluation for participants

Participants receiving training in Module 3.3 are not subject to formal assessment. However, in order for you to assess the knowledge and skills you have acquired on game value, and for the trainer to ascertain how effective the training has been, you are encouraged to answer for yourself the following questions and discuss your answers – as part of a group or individually – with your trainer.

- 1. Can I explain what is meant by 'game value'?
- 2. Can I briefly list the different types of benefits that might be obtained from wildlife management?
- 3. Can I describe the advantages that managing wildlife can provide as a form of land use, and the relevance to my conservancy?
- 4. Do I understand the different ways in which wildlife can be used (different types of utilisation), and which might be most suited to my conservancy?
- 5. Can I explain the different types of benefits that can be obtained from the different uses of wildlife, and whether these benefits are likely to be small, medium or large?
- 6. Can I explain how a number of different types of wildlife use may be undertaken in the same conservancy, and how doing this would increase the amount of benefits?
- 7. Do I understand how one form of wildlife utilisation may potentially undermine another if they are not both carefully planned and managed? Can I suggest examples from my conservancy (or a neighbouring one)?
- 8. Can I list the main things to take into account by conservancies when considering trophy hunting, and what might influence prices?
- 9. Can I list the main things to take into account by conservancies when considering harvesting and culling for meat, both for sale and own use, and what might influence prices?
- 10. Can I explain the key factors that need to be taken in account when making decisions about the types of wildlife utilisation in a conservancy?
