Balyerwa **Climate and Vegetation Report**

D1

Adapting in response to the current environmental conditions ...

Seasonal trends in rainfall and vegetation (2021 / 2022 Season)

Vegetation cover trend (2000 - 2021)

High vegetation cover is good because more rainwater is prevented from running off, causing less erosion. Also the soil is shaded leading

Vegetation productivity (February to April) 2022

Fire management

Much bare ground

Forage availability During the growing season enough forage must be

4) Forest

-Do nothing produced to sustain livestock and game until the next -Buy more animals -Move animals to better grazing rainy season -Sell old and unproductive animals -Acquire additional forage 20 10 normal -10 Very poor -20

Normal forage availability

-30

Management Options

Climate and vegetation patterns assist in our understanding of the status of wildlife and livestock in the conservancy for the effective management of these resources.

Prevent late burns next season
