≠Khoadi-//Hôas Climate and Vegetation Report

Growing season

Adapting in response to the current environmental conditions ...

Seasonal trends in rainfall and vegetation (2020 / 2021 Season)

Vegetation cover trend (2000 - 2020)

High vegetation cover is good because more rainwater is prevented from running off, causing less erosion. Also the soil is shaded leading

Zones

Vegetation productivity (February to April) 2021

Times burned

3 - 5

6 - 9

10 - 13 ■ >13

Burns between 2000 and 2020 When and where it burnt in 2020

Burned area April - July Aug - December

Forage availability During the growing season enough forage must be

Below normal forage availability - Enough for livestock and game?

Management Options

Climate and vegetation patterns assist in our understanding of the status of wildlife and livestock in the conservancy for the effective management of these resources.

Prevent late burns
