Okondjombo Climate and Vegetation Report

Adapting in response to the current environmental conditions ...

Seasonal trends in rainfall and vegetation (2020 / 2021 Season)

Vegetation cover trend (2000 - 2020)

High vegetation cover is good because more rainwater is prevented from running off, causing less erosion. Also the soil is shaded leading to a decrease in soil temperature and evaporation.

Vegetation productivity (February to April) 2021

Fire management Burns between 2000 and 2020

Times burned

3 - 5

6 - 9

■ 10 - 13 ■ >13

Burned area

When and where it burnt in 2020

April - July

Aug - December

Forage availability

During the growing season enough forage must be produced to sustain livestock and game until the next rainy season

Far below normal forage availability - Enough for livestock and game?

Management Options

-Do nothing

-Buy more animals

Climate and vegetation patterns assist in our understanding of the status of wildlife and livestock in the conservancy for the effective management of these resources.

Prevent late burns
